

CSCI 4177/5709 — Advanced Topics in Web Development

Assignment 2 Checklist

REQUIREMENTS		Completed
A2.1	Choose 1 feature from the list of “Must Have” features you defined in your Proposal (i.e., Project Scope)	
A2.2.1	Include a brief description of your application, user persona(s), and any assumptions, pre-requisites or requirements (if applicable) (Target User Insights)	
A2.2.2	Include the relevant scenario(s) for each task within the feature you have chosen to design the Back-End for. (Interaction Design)	
A2.2.2	Include the relevant usability maps for each task within the feature you have chosen to design the Back-End for. (Interaction Design)	
A2.2.2	Include relevant figures and tables to help you illustrate how your application’s Front-End is expected to work and the expected support from the Back-End. (Interaction Design)	
A2.2.2	Include a description of the overall Back-End workflow of your application with a focus on how the Back-End will support the Front-End. (Process and Service Workflow)	
A2.2.2	Include information on how and where processes (for your chosen feature) will be triggered and handled. (Process and Service Workflow)	
A2.2.2	Include relevant figures and tables to help you illustrate how the back-end of your application’s <i>processes and services</i> work (e.g., workflow diagrams). (Process and Service Workflow)	
A2.2.2	Include a diagram detailing the expected file and folder structure for your intended features. (Process and Service Workflow)	
Submission		
	Before submission, check your References are all included using either ACM or IEEE format, all your references must also be cited within the text (i.e., do not simply include them as a list in the Reference Section)	
	Before submission, check all your figures and tables are properly captioned and referenced within the text.	
	Check the Marking Rubric to guide you in assessing your work.	
	Submit your individual A2 deliverable as a single PDF to Brightspace.
